#### About Dimension Technologies Inc.

Dimension Technologies Inc. (DTI), based in Rochester, New York, was founded in 1986 and is the world's only producer of commercially available large screen flat panel 2D/3D switchable displays. The company has won numerous entrepreneurial honors and recognition as the pioneer in 3D display devices. DTI holds most of the world's major patents in the field of autostereoscopic displays, and has marketed increasingly sophisticated 3D imaging systems to medical, aviation, military, research, scientific, design and consumer markets. In addition to complete displays, the technology is also available for licensing for inclusion into OEM products. Virtual Window and Real-Depth 3D are either registered trademarks or trademarks of Dimension Technologies Inc. in the USA and/or other countries. All other brand names, product names, or trademarks belong to their respective holders.
